

## Laying the foundations for a bright future

Website link: [www.htpfederation.co.uk](http://www.htpfederation.co.uk)

A little note from Mrs FitzGerald...

Time is flying; I cannot believe it is February next week already! Hawthorn Class shared some of their super learning in their Class Presentation this afternoon ~ they have certainly been working hard. Well done Hawthorn Class!

We are very much looking forward to 'National Storytelling Week' in the week ahead and hope lots of you are able to make our 'share' session on Friday morning at 9am until 9.45am.

Have a lovely weekend 😊

Warm regards,  
Mrs. FitzGerald

### **SEVERE WEATHER**

**Every effort will be made to keep the school open in severe weather. The school would only close if it is no longer safe for staff and pupils to travel to school and be on site.**

**We recognise that it is important that our school remains open so parents are able to work and pupils can continue to learn. Therefore, we will make every effort to prepare for severe weather.**

**Information about school closure will be posted:**

- On local radio
- Via the Suffolk County Council website: <http://schoolclosures.suffolk.gov.uk/>
- Via our Facebook page
- On ParentMail

### **REPORTING ABSENCE / GENERAL QUERIES**

Please note all absences, need to be reported to the School Office in the first instance. The Administration Team, Mrs Price and Mrs Mitson, are responsible for attendance reporting and whilst we very much appreciate parents updating Class Teachers via Class Dojo, it is vital this information is shared directly with the School Office as soon as possible.

Our Administration Team, Mrs Price and Mrs Mitson, can be contacted by telephoning 01440 786217 or via email at [admin@hundonschool.co.uk](mailto:admin@hundonschool.co.uk) The team are also best placed to support with general queries related to morning sports club, football club, school meals, payments and so on.

For learning related matters it is, of course, your child's Class Teacher you need to speak to and the easiest and quickest way for this is via our learning platform, Class Dojo.

## ATTENDANCE & PUNCTUALITY

Attendance and punctuality are central to ensuring all pupils can fulfil their potential ~ pupils need to attend school regularly to benefit from their education. Arriving late and missing lessons leaves children vulnerable to falling behind and can lead to difficulties with anxiety, anger and maintaining friendships.

Many pupils have difficulty maintaining friendships if they have long or numerous periods of absence. It is widely acknowledged that children with poor attendance achieve less in both primary and secondary school.

Please help your children and us by ensuring they arrive at school on time. The morning register is called promptly at 9am. Any child arriving after this time will be marked as late. The register closes at 9.20am, any child arriving after this time will receive an unauthorised late absence.

Please remember any leaves of absence must be taken in school closure periods unless there are rare and strictly exceptional circumstances. You can also support your child's learning and progress by ensuring that non-urgent appointments, for example, dentist, optician, GP, are arranged outside school hours.

Thank you for your support in this matter.

Dear Parents/Carers,

### **Industrial Action**

You may be aware from media coverage that the National Education Union (NEU) have declared strike action, which is planned to take place on Wednesday 1 February 2023, Wednesday 15 March 2023 and Thursday 16 March 2023. A further strike for the Eastern Region is scheduled to take place on Wednesday 1 March 2023. The strike is happening because of a national dispute between the unions and the government over teacher's pay and **not because of any issues at either of our schools.**

We continue to work closely with our staff and I want to reassure you that our schools, **Hundon and Thurlow will be unaffected by this industrial action.** We remain committed to providing a safe and secure environment for all our pupils and delivering high quality teaching.

To reiterate, the **provision at Hundon Community Primary School will not be affected** and **your child/ren should attend as usual.**

Should this situation change we will be in touch to update you on our plans. If you have any questions, please contact me at school on 01440 786217 or via email at [admin@hundonschool.co.uk](mailto:admin@hundonschool.co.uk)

Kind regards, Mrs FitzGerald

## FORTHCOMING EVENTS

### SPRING TERM 2023

*Please note the presentation dates have been adjusted to ensure all classes have sufficient learning within their new themes on which to draw.*

**Monday 30th January to Friday 3rd February ~ National Storytelling Week**

**Friday 3rd February ~ 'Share' morning ~ join your child from 9am until 9.45am in activities linked to storytelling ~ we look forward to seeing you!**

**Tuesday 7th February ~ Safer Internet Day**

**Friday 10th February ~ Oak Class Presentation**

**Friday 10th February ~ END OF HALF-TERM**

**Thursday 23rd February ~ Oak Class Trip to Cromer Museum**

**Friday 24th February ~ Cherry Class Presentation**

### **REMINDER ~ Strep A infections**

With the recent national increase in notifications of Strep A infections in children as well as rises in Scarlet Fever and related press coverage the following is provided for your information.

Group A streptococcus (GAS) is a common bacteria. Lots of us carry it in our throats and on our skin, and it doesn't always result in illness. However, GAS does cause a number of infections, some mild, like scarlet fever, and some more serious.

The most serious infections linked to GAS come from invasive group A strep, known as iGAS. These infections are caused by the bacteria getting into parts of the body where it is not normally found, such as the lungs or bloodstream. In rare cases, an iGAS infection can be fatal. Whilst iGAS infections are still uncommon, there has been an increase in cases this year, particularly in children under 10, and sadly, a small number of deaths across the UK.

As parents, you should monitor your child for any GAS/scarlet fever symptoms, and take action to get treatment as soon as possible. Symptoms include a **sore throat, headache, fever, nausea and vomiting**. This is followed by a **fine red rash, which typically first appears, on the chest and stomach, rapidly spreading to other parts of the body**. On more darkly-pigmented skin, the scarlet rash may be harder to spot, but it should feel like 'sandpaper'. The face can be flushed red, but pale around the mouth. **It should be treated as soon as possible, with antibiotics, to minimise the risk of complications, and reduce the spread to others.**

**If you think you or your child may have GAS/scarlet fever:**

- See your GP, or contact NHS 111, as soon as possible
- Make sure that you/your child takes the full course of any antibiotics prescribed by the doctor
- Stay at home and away from school for at least 48 hours after starting the antibiotic treatment, to avoid spreading the infection
- Notify the school that your child has a suspected or confirmed case

If your child has an underlying condition, which affects their immune system, you should contact your GP or hospital doctor to discuss whether any additional measures are needed

As a parent, if you feel that your child seems seriously unwell, **you should trust your own judgement.**

**Contact NHS 111 or your GP if:**

- your child is getting worse
- your child is feeding or eating much less than normal
- your child shows signs of dehydration
- your child is very tired or irritable

**Call 999 or go to A&E if:**

- your child is having difficulty breathing – you may notice grunting noises or their tummy sucking in under their ribs
- there are pauses when your child breathes
- your child's skin, tongue or lips are blue
- your child is floppy, and will not wake up or stay awake

Further information is available from the following links:

[UKHSA update on scarlet fever and invasive Group A strep](#)

[Fact sheet covering what scarlet fever is, and other frequently asked questions](#)

[Scarlet fever guidance on symptoms, diagnosis, and treatment](#)

**GAS/scarlet fever is spread by close contact with an infected person, and can be passed on through coughs and sneezes, or from a wound. It is therefore important to maintain good hand and respiratory hygiene to stop the spread.**
